

RAJKUMAR SINGH

Frontend / Full Stack Developer — React.js, JavaScript, Node.js, Python

Bangalore, India | rajengineerx@gmail.com | +91 9341288029 | [in LinkedIn](#) [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer specializing in React.js and JavaScript, with backend proficiency in Node.js and Python/Flask. Independently designed, built, and deployed two production full-stack applications — a JWT-authenticated AI chat platform integrating a third-party LLM API, and a browser-based real-time speech-to-text and translation tool supporting 16 languages. Debugged and resolved a live production bug involving a deprecated API dependency, restoring full functionality. Strong fundamentals in React hooks, REST API integration, and Git-based workflows. 2025 BCA graduate seeking an entry-level Frontend or Full Stack Developer role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, HTML5, CSS3

Frontend: React.js, React Hooks (useState, useEffect, useCallback), Responsive Design, REST API Integration

Backend: Node.js, Flask (Application Factory Pattern), JWT Authentication, SQLAlchemy ORM, Flask-CORS

Tools & Platforms: Git, GitHub, Render, Vercel, VS Code, Postman, Windows, Ubuntu

Currently Learning: React Native for cross-platform mobile development

PROJECTS

PromptPal — AI Chat Web Application

Mar 2025 – Present

GitHub: github.com/raj-07/PromptPal | Live Demo: promptpal-wv2f.onrender.com

- Built and deployed a full-stack AI chat application end-to-end using a Flask backend (application factory pattern) and a responsive HTML/CSS/JavaScript frontend, replicating the core ChatGPT experience.
- Implemented secure user authentication with hashed password storage and JWT-based session tokens using Flask-JWT-Extended, backed by SQLAlchemy models for persistent user data.
- Integrated the Groq API for low-latency LLM inference, handling real-time prompt submission and context-aware AI responses.
- Diagnosed and fixed a production bug caused by a deprecated third-party model dependency that was silently breaking every chat response; restored full functionality and hardened the app's database initialization and dependency configuration for reliable cloud deployment.
- Enabled cross-origin requests via Flask-CORS and implemented UX features including auto-scroll, loading animations, and copy-to-clipboard.

Voxscribe — Real-Time Speech-to-Text & Translation App

Apr 2024 – Jun 2024

GitHub: github.com/raj-07/voxscribe | Live Demo: voxscribe-07-fb5a.vercel.app

- Built and deployed a real-time speech-to-text and translation web app running entirely client-side, with no backend or build step.
- Used the Web Speech API for continuous live transcription with interim and finalized result handling across 16 languages, including Hindi, Kannada, and Tamil.
- Integrated the MyMemory Translation API for real-time text translation to English, with start/stop voice controls, copy-to-clipboard, and error handling for unsupported browsers.
- Designed a clean, responsive layout consistent across mobile and desktop browsers.

EDUCATION

Bachelor of Computer Applications (BCA) — Presidency University, Bangalore	7.85 CGPA 2025
XII, Science — R K Sita +2 High School, Hariharganj	78.2% 2022
X — Stronnat High School, Tendua Hariharganj	87.80% 2020

CERTIFICATIONS

- Full Stack Web Development — Apna College
- Data Structures & Algorithms in Java — Apna College
